Tutorial 1

Contact Information

Email: melissavanbussel@cmail.carleton.ca

GitHub: www.github.com/melissavanbussel

Section E3: Wednesdays 7:35-8:25

Section E4: Wednesdays 8:35-9:25

A note about email: The TAs are not given hours for office hours or emails for this course. Please contact by email for issues related to the labs only (other emails will be forwarded to the Professor)

Resources for the course

- For questions related to what we do in the labs: email me
- For questions related to grading: email the Professor
- For questions related to the course in general: use the Discussion Forum on cuLearn or email the Professor

For help with course content (such as going through practice problems, old assignment questions, textbook questions etc), please use the Math Tutorial Centre or the MS-LAP (Mathematics and Statistics Learning Assistance Program)

Math Tutorial Centre (MTC)

- FREE Online help from TAs, available Monday-Friday 10am-9pm
- Search on Google for “Carleton Math Tutorial Centre” for the schedule
- Look for anyone whose name has a “P” or “S” beside it (Probability & Statistics)

MS-LAP

- Videos solving practice problems for this course
- <https://carleton.ca/math/math-learning-assistance-program/>
- Available through cuLearn
- You can also use it to ask questions

Questions, Comments, Concerns

If at any point during the semester you have any comments regarding the labs specifically, please feel free to use the following (anonymous, unless you choose to include your name):

<https://forms.gle/auih2D7vs6nVjKPE7>

I will get an email whenever a response is submitted -- feedback will be seen promptly!

Examples of helpful feedback: Moving too quickly / slowly, talking too quickly / slowly, talking too quietly / loudly etc.

Let's get to know each other!

Even though the semester is online, I would still like to get to know everyone! At the end of the lab, use the feedback form to tell me a bit about yourself.

- Name
- Program / year
- Anything else you might want me to know about you!

This will also help me get a sense

Today's Tutorial

- Construct a scatterplot in SPSS
- Construct a line chart in SPSS
- Construct a histogram in SPSS
- Compute summary statistics in SPSS
- Obtain least-squares regression line in SPSS
- Use the feedback form to tell me a bit about yourself
- I will stick around for questions at the end
